

International Day to COMBAT ISLAMOPHOBIA

Commemorate with us on March 15th

A Joint Call to Action: The March 15th Forum joined hands with a coalition of more than a dozen Muslim civil organizations around the world to mark the United Nations designated International Day to Combat Islamophobia and issued a joint call to action statement highlighting the injustices being perpetrated against the Muslim community.

The March 15th Forum has challenged the private sector to defeat Islamophobia by promoting unity, tolerance, and solidarity with all humanity. The Forum has invited over 200 private sectors worldwide to attend the [convention to commemorate International Day to Combat Islamophobia](#) and issue a statement expressing solidarity with the Muslim community. Unfortunately, the private sector is failing to fulfill its corporate social responsibilities.

Islamophobia Scorecards: The Forum has developed objective criteria to grade individuals and organizations for their anti-Muslim activities and assigns scores for Islamophobia as an [Islamophobia Scorecard](#).

The March 15th Forum's mission is that businesses making millions within the Muslim community have an obligation to combat Islamophobia and prove that they are not engaged in anti-Muslim prejudice, hate, and discrimination. Like US laws, the burden of proof must rest on the shoulders of the business community. It is a campaign for accountability and not a boycott.

Community Engagement Programs: The Forum launched a community engagement program. The program asked the community to vote for the Islamophobe of the Year 2023. [Joe Biden earned the title of the Islamophobe of the Year 2023.](#)

In the name of God, the Most Compassionate, the Most Merciful
 All praise and thanks belong to God, the Lord of the Worlds,
 May peace and prayers be upon Prophet Muhammad

On behalf of the communities we serve in our respective countries around the world, the undersigned Muslim organizations today commemorate the UN’s Second International Day to Combat Islamophobia. We do so by calling the attention of those committed to advancing justice for all people to injustices being perpetrated by the governments of Israel, India, China, and France.

Israel’s decades of occupation and apartheid have arrived at a predictable conclusion: genocide in Gaza. Some states, such as South Africa, have asserted international humanitarian values. Other states, such as the United States and the United Kingdom, have provided military aid and political comfort to Israel while ignoring the daily stream of videos documenting Gaza’s reduction to rubble and Palestinian civilians crying for food, medicine, or over their dead children.

This latest cycle of Middle East violence has impacted our constituencies as a spike in hate against Muslims in Western countries who speak up for Palestinian human rights accompanies Israel’s onslaught.

India’s far-right, anti-Muslim government continues its repression of religious and racial minorities in that nation, particularly Muslims. Early this year, Prime Minister Modi continued to weaponize faith in his nation when he inaugurated a temple on the site of the former Babri Mosque, which was destroyed in 1992 by Hindutva nationalist mobs.

The Chinese government advanced efforts to “Sinicize” Islam in that nation by erasing mosques and Muslim cemeteries and implementing policies of internment and forced labor for ethnic and religious minorities in the Muslim-majority Xinjiang province.

France continued efforts to erase visible clothing associated with an individual's Islamic identity from public spaces. Most recently, the government banned Muslim students from wearing the abaya, a long, flowing robe-like garment worn by many Muslim women. Education Minister Gabriel Attal said in an interview with TV channel TF1, "When you walk into a classroom, you shouldn't be able to identify the pupils' religion just by looking at them." Other French Ministers even admitted that though the abaya is not a religious garment, students will be targeted based on their assumed religion thereby further legalizing religious discrimination against French Muslims.

Last year, Muslim organizations came together to make a joint call to action. In 2024 and in light of the above, we make the following calls to action:

1. Nations should recognize the UN International Day to Combat Islamophobia and in particular strongly call on the above nations to abandon anti-Muslim activities.
2. Muslim-majority nations should take the opportunity of today's commemoration to challenge Islamophobia generally and the above nations specifically.

The groups joining together on this statement commit to continuing to work in their respective nations and regions to promote an international norm in which respect for human rights and the diversity of religions and beliefs is valued through political action.
